

IMPLEMENT INTRODUCTION

OVERVIEW OF PREPARE TO IMPLEMENT PHASE

The worksheets in the **Prepare to Implement** phase are designed to help your team begin to think about how you might work to implement your solution if you were to receive funding. At this phase of the design challenge, you are moving from an idea you are developing to a concept you are working to implement. A concept is a robust idea that has been developed through multiple rounds of prototyping.

The work of this workshop can be done collaboratively with school-based teams only.

This phase of the design process will include: refining your idea and project planning.

OBJECTIVES OF PREPARE TO IMPLEMENT PHASE

The goal of this phase is to get your design team aligned around what the next steps are that would be required to implement your concept. Also consider your long-term goals for improving the holistic learning outcomes for students.

At the end of this phase, all team members should be clear on what needs to happen next.

MINDSETS OF PREPARE TO IMPLEMENT PHASE

- Work together to understand the context
- Look closely to understand potential problems and opportunities
- Stay optimistic that you can solve the problem
