

Designing with Government Stakeholders

How might we work better together?

Think of one example of successful collaboration between government and other education stakeholders that you were part of:

- What was the situation?
- What happened?
- What roles did you play?
- What role did government play?
- What roles did other stakeholders play?
- What was the outcome?

What are the common themes that emerged from the stories at your table?

Identify 3-5 themes and write each theme on an individual post-it note.

For your theme/cluster, discuss and identify 5-6 success factors that enable good collaboration.

Write success factors on flip chart paper.
